

RICK PIÑA COACHING

WISPR FLOW

TYPE AT THE SPEED OF THOUGHT

The AI voice tool that types for you, 4x faster than your keyboard.

4X

FASTER THAN TYPING

patreon.com/rickpina

WHAT IS WISPR FLOW?

Voice dictation that types into ANY app on Mac, Windows, iPhone, and Android.

Hold a hotkey. Talk. It types clean, edited text wherever your cursor is.

EVERY APP

Email, Slack, Word,
browser, Teams

EVERY DEVICE

Mac, Windows, iOS,
Android

100+ LANGUAGES

Even works when you
whisper

ALWAYS ON

One subscription, all
your devices

WHY I LOVE IT

1

I think faster than I type.

Wispr closes the gap between thought and output.

2

It strips the rambling.

Removes 'um,' 'uh,' 'like,' and backtracks automatically.

3

It punctuates and paragraphs for me.

I never say 'comma' or 'period.' It just knows.

4

It writes in MY voice.

Because I'm the one talking. Not generic AI.

5

It saves my hands.

Less fatigue on long writing days.

IT KNOWS WHERE YOU ARE TYPING

Same voice. Different tone. Automatic.

IN SLACK

*"hey can we move the 2pm to 3?
something popped up"*

Casual. Conversational. Quick.

IN GMAIL

*"Hi Sarah, would it be possible to push our
2:00 PM meeting to 3:00 PM today?
Something just came up. Thank you."*

Professional. Polished. Customer-ready.

10 WAYS TO USE IT

1 Email replies

2 Proposals & long-form docs

3 Slack & Teams messages

4 Coaching notes after a session

5 LinkedIn & social posts

6 Voice-edit text on the fly

7 Coding & technical writing

8 Sermon prep & Bible study notes

9 CRM updates & call follow-ups

10 Texting on mobile (faster than thumbs)

EDIT WITH YOUR VOICE

Highlight any text. Hold the hotkey. Tell it what to do.

"Make this more professional"

"Turn this into bullet points"

"Shorten this to two sentences"

"Translate to Spanish"

"Make it sound warmer"

"Fix the grammar"

WHAT IT COSTS • WHAT TO WATCH FOR

PRO PLAN

\$12

PER MONTH

Pays for itself the first week if email is a big part of your day.

ONE HONEST CAVEAT

Like any AI, it can mishear technical terms or names.

A 5-second proofread before you hit send is still smart.

ALWAYS REVIEW. ALWAYS YOUR VOICE.

LIVE DEMO

Watch me do it on screen. Three quick examples.

1

Dictate an Email

Open Gmail. Hold the hotkey. Speak the reply naturally.

Watch the rambling become a clean, professional email.

2

Voice-Edit a Draft

Highlight a paragraph. Say "make this shorter and warmer."

Watch it rewrite the selection in real time.

3

Post to LinkedIn

Talk through a 30-second story about a recent win.

Watch a polished LinkedIn post appear, ready to publish.

STOP TYPING. START TALKING.
